Portfolio Project: Week 1 Report and Peer Feedback

Book Store Web app by Jeph Daligdig

1. What kind of project is this?

- Will you be converting an existing project or starting from scratch?
  - I will start from scratch.
- Will you be working solo or putting a team together?
  - I will be working solo.
- What is the general goal or vision of your project?
  - The general goal of my project is to showcase and solidify my skills in web development.
- Do you already have a use case or client in mind for your project? It's great if you do, but also fine if you don't.
  - This project aims to cater to book enthusiasts who enjoy searching for and purchasing books online.

2. What are some technical features you'd like to showcase in your project?

- Based on what you know about React so far, what are some things you'd like to include? Think in terms of technical elements like adding or removing items to a list, searching, filtering, fetching data from an API, etc.
  - The project includes adding, removing items to a list, searching, filtering, fetching data from an API.
- Do some research on similar applications to see what kinds of features are included that you might add to a "wish list" of features for your project idea. Include a list of the URLs you visited in your research as references in your report, so that you can easily refer back to them as you refine your project plan over the coming weeks.
  - Websites/References already bookmarked on google chrome.
- This week, you are still brainstorming and developing your project vision. Next week, you'll narrow down your list of ideas to develop your MVP.

3. What questions are on your mind at this point in your project ideation?

- Don't worry about HOW you will code your project at this stage. Instead, what questions are on your mind as you think about what kind of project to do or what kinds of features it should have?
    - What API will I use for the Book Store App?
    - What UI design platform should I use?
    - Will the book app have a user registration?
    - Should I use a UI kit for the web app?
- What kind of feedback are you hoping to receive from your peers about your project idea?
    - I hope someone could have a feedback and have suggestion on my Book app, on what API should I use and what are the must features a book enthusiast would like to have on the website as they search and purchase a book.
    - Share to me any UI kits for the Book Store App.
